FOR IMMEDIATE RELEASE: (02/9/2018)

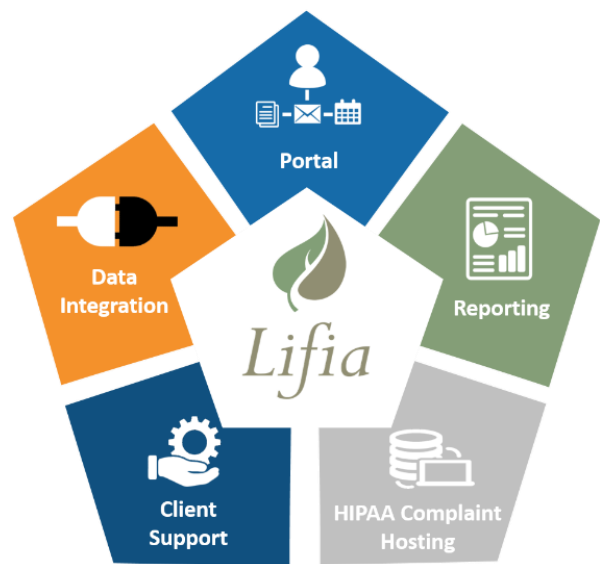

Lifia Public Health Portal Demonstration

EAST LANSING, MI, (February 8, 2018) – A.J. Boggs & Company is presenting its **Lifia Portal** at a Lunch and Learn meeting on Wednesday February 14th at Noon at its East Lansing offices. MSU’s Lead Developer of the Lifia.me community form, Irem Gokce Yildirim, will be attending the meeting. The public is welcome. Please RSVP by 4PM on Tuesday Feb. 13th at <https://www.meetup.com/Lifia-Portal-Demonstration/events/247649327/>

The **Lifia Portal** (www.lifia.org) helps public health programs manage enrollment and eligibility for drug assistance and case management with secure, HIPAA-compliant hosting services. Imagine you are able to manage your programs and streamline your processes while generating tailored reports quickly and intuitively using different data sources. Now, stop imagining, Lifia™ is real and available to improve public health programs.

Clarke Anderson, CEO of A.J. Boggs & Company, the developer of Lifia, said: *“We created a data collection and new reporting tool for programs that serve people living with chronic illnesses make it easier to manage their data. The new portal shows the ease of use and power of new web technologies (Angular JavaScript and MongoDB).”*

The system is set up to allow people living with HIV (PLWH) to gain access to manage and track their data in public health systems. AJBoggs is also funding research at MSU to develop a new forum product (**Lifia.me**) where PLWH can join a community where anonymous peer support is available. PLWH will be able to register anonymously to join the portal where a peer community helps each other cope with various challenges and support needs. The tool also will also support community members to facilitate and improve their experience so that the rest of the community benefits too.

The Lifia web portal platform can play significant role in people’s lives, helping them to access their health information and manage their benefits by joining a community that they can trust. The ultimate goal is to keep improving healthcare programs while contributing to the society. **For more information, visit www.lifia.org.**
